

TECHNICAL INFORMATION

CANAVIT NIACIN (B3)

Vitamin Niacin

- Vitamin **Niacin** is for animal nutrition in premixes and compound feeds.
- Vitamin **Niacin** is found as nicotinic acid in varying concentrations in almost all feeds of plant origin.
- Nicotinamide is frequent in animal cells.

Application

- Vitamin **Niacin** is a constituent of NAD and NADP which act as hydrogen-transferring co-enzymes and participate in vital metabolic reactions (carbohydrates, fats and amino acids).
- Vitamin **Niacin** is a key function in energy metabolism.

Character of Product

- Canavit **Niacin** is white in color and is a fine crystalline powder.

Activity

- At least 99% nicotinamide.

Solubility

- Canavit **Niacin** (Nicotinamide) is easily soluble in water.

Storage

- Keep well closed, cool and dry in the original packing.

Stability

- Guaranteed activity for 24 months after manufacture, closed packing and adequate storage conditions provided.

Packaging

- Units of 20 kg net.
