

TECHNICAL INFORMATION

CANAVIT B₆ HCL

Vitamin B₆

- Vitamin B₆ (Pyridoxine Hydrochloride) for animal nutrition in premixes and compound feeds.
- Vitamin B₆ is found in feed of plants and animal origin.

Application

- Vitamin B₆ is involved in the metabolism of fats, minerals, amino acids and carbohydrates.
- Deficiency of vitamin B₆ may reduce hatchability in poultry.

Character of Product

- Canavit B₆ is white in color and is a free flowing powder.

Activity

- At least 98% pyridoxine-hydrochloride.

Solubility

- Canavit B₆ is easily soluble in water.

Storage

- Keep well closed, cool and dry in the original packing.

Stability

- Guaranteed activity for 24 months after manufacture, closed packing and adequate storage conditions provided.

Packaging

- Units of 25 kg net.
