

L-CARNIVIT 25% NEOFARMA

TARGET SPECIES

Ruminants

STUFF KIND

Premixture

FORM

Solution for oral use

CHARACTERS

Clear, red without precipitates and foreign matter liquid

pH

8.0 - 9.50

RELATIVE DENSITY

0.90 - 1.10 Kg/lt

COMPOSITION

**Vitamins
Carrier**

1 Litre contains:

L-Carnitine

250 000 mg

Mineral carrier up to

1 lt

PROPERTIES

L-Carnitine acts as a carrier in the transport of activated long-chain fatty acids. It is thus an essential factor in the supply of energy to cells, mainly muscle. Moreover, its role in detoxifying excess intracellular acyl groups and in the production of metabolic energy from medium-chain fatty acids, pyruvate and ketone bodies, adds importance to it. L-Carnitine also stimulates lipolysis and thermogenesis.

INDICATIONS

L-Carnivit 25% Neofarma is effective to improve fat and energy metabolism and health and well-being of the animals. The product is indicated to increase growth, during stress (thermic, pregnancy, lactation, change in feed, transport, high-fat diet). It is also indicated in cardiac, liver, kidney disorders and fertility problems.

DOSAGE AND USE

Carefully mix the following dosage: 30 ml per 1000 litres of drinking water or milk replacer

TREATMENT PERIOD

3 - 5 Consecutive days.

WARNING

Store in cool and dry place, away from direct light.
