

# L-CARNITINE 50% L-CARNITINE 50%

- TARGET SPECIES** Dogs
- STUFF KIND** Premixture
- FORM** Feed grade powder
- CHARACTERS** A fine, greyish powder

<b>COMPOSITION</b>	1 Kg contains:	
Vitamins	L-Carnitine	500 000 mg
Carrier	Mineral carrier up to	1 kg

**PROPERTIES** L-Carnitine acts as a carrier in the transport of activated long-chain fatty acids. It is thus an essential factor in the supply of energy to cells, mainly muscle. Moreover, its role in detoxifying excess intracellular acyl groups and in the production of metabolic energy from mediumchain fatty acids, pyruvate and ketone bodies, adds importance to it. L-Carnitine also stimulates lipolysis and thermogenesis.

**INDICATIONS** L-Carnimix 50% F.G. is effective to improve fat and energy metabolism and health and well-being of the animals. The product is indicated to increase growth, during stress (thermic, pregnancy, lactation, change in feed, transport, high-fat diet)

**DOSAGE AND USE** Carefully mix the following dosage:  
1.5 g per Kg/feed

**TREATMENT PERIOD** 3 - 5 Consecutive days.

**WARNING** Store in cool and dry place, away from direct light.

**PACKAGING** 0.1 - 1 Kg bag of coupled polyfilms

# L-CARNIMIX 50% F.G.
